Project plan

Basic information

Team members: Tapio Paloniemi and Teemu Halmi

Github address: https://github.com/tapiopa/DevBasicSkills2017-Team07

Used tools: Coda, Visual Studio, Tower, Vim, Node.js

Overview

1. Planning	27-28.11.
2. Designing a user interfaces	28-29.11
3. Designing functionalities	30.11 – 1.12.
4. Implementing functionalities	4 - 8.12.
5. Intergration	11.12.
6. Testing and polishing	12-14.12.
7. Final product ready	15.12.

Activities

1. Writing a project plan and dividing tasks. Making general plans of implementation.

2. Making a mockup of user interface and designing functionality. Partial implementation of user interface.

3. Designing mockups for different modules of the program and designing how to implement mathematical functions most effectively.

4. Writing code.

5. Integrating user interface and mathematical functions.

6. Testing fucntionality, usability and correct functioning. Code polishing and bug fixing.

7. Product is ready for public use.

Time estimates

1. 8h

2. 8h

3. 8h

4. 32h

5. 8h

6. 24h

7. 1h
